## **New Boiler Product Literature Unveiled** **EASCO INTRODUCES ALL NEW PRODUCT LITERATURE**

Bronx, NY ( November 20, 2001) -- EASCO Boiler Corporation has recently unveiled a complete new line of product literature for its PLW - Low Pressure Steam and Hot Water Firebox Boiler (53-661 BHP), FST - Low Pressure Steam and Hot Water Scotch Marine Boiler (20-700 BHP), ESP - Low Pressure Steam and Hot Water Scotch Marine Boiler (70-450 BHP) and Field-Erected Scotch Marine and Firebox Boilers (20-1000) Product Line.

The colorful new literature features crisp clear dimensional drawings, large rating and capacity data, ordering nomenclature and product feature information. Additional copies of this literature is available upon request to: Greg Condon, 1175 Leggett Avenue, Bronx, NY 10474, tele: 718-378-3000, fax: 718-378-4560, website: [www.easco.com](http://www.easco.com). The release of this new product literature was timed to coincide with EASCO's expansion of its quality field-erect and packaged firetube product lines to a serve its newly established nationwide sales network. EASCO Boiler Corporation has served the greater New York area with high-quality field-erected and packaged firetube boilers for over four decades.

EASCO Boiler Corporation is a division of Eastmond Corporation - located in the Bronx, NY - manufacturers of quality packaged firetube boilers, UL-listed field-erected boilers, providers of mobile boiler rooms and complete boiler room services.
